

STONHARD®

Installation Safety Program

As the market leader in the installation of seamless polymer floor, wall and lining systems, Stonhard recognizes the risks inherent in new construction and renovation projects. We never leave the safety and security of our clients employees, installation teams and other on-site trades. We always take job site safety and proper training seriously.

Knowledge is power

A safe and effective installation begins with a thorough understanding of safety procedures, product characteristics, equipment operation, the job site environments and specific customer site requirements. With the different Safety - certifications; ISO 45001, MASE, VCA** we achieve our Safety-culture. Stonhard is dedicated to reducing incidents and protecting its employees by focusing on building a sustainable, proactive EH&S culture and achieving a vision of zero incidents and excellence.

Prevent costly delays

Effective organization and planning will prevent costly project delays. Appropriate safety documentation and ongoing communication helps ensure an uninterrupted, hassle-free installation process.

Safety resources make the difference

To ensure that every installation is completed safely and efficiently, Stonhard developed a comprehensive set of safety resources. We've highlighted these resources for you here. Also, a team of safety experts is available at any time to answer questions or concerns that may arise.

Stonhard's Installation Safety Resources

Safety Data Sheet (SDS)

Access to all Stonhard product SDS is available through the corporate website or through your local Stonhard Sales representative. Our SDS meet and/or exceed the United Nations Globally Harmonized System of Classification and Labeling of Chemicals requirements and are available in 16 languages.

Site Specific Safety Plans

Stonhard's EH&S staff regularly develop plans that specify the minimum health, safety and emergency response requirements to be followed by Stonhard personnel and our subcontractors during the construction activities of a particular project. These plans include a detailed Job Hazard Analysis, designation of EH&S responsibilities, a description of the Stonhard products and necessary protective measures and any additional information that may be required by the customer or general contractor.

Environmental Health & Safety (EH&S) Department

Stonhard provides a fully-staffed EH&S Department committed to safety, from project inception to final walkthrough. A complete list of staff contact numbers is available from the corporate office to ensure ready access to all business and emergency numbers at Stonhard.

Stonhard is committed to project site safety and customer satisfaction on every project, across the country and around the world. Find out why Stonhard is the world leader in high-performance, quality floor, wall and lining systems.
